If the e-learning option is booked

If you only wish to have a few of your staff members trained to this qualification standard but want to have all other staff members trained to an intermediate level, then why not combine a FAST5 with an e-learning option?

The cost of this will be £450 + VAT for the FAST5 plus the discounted pro rata cost of each person doing the qualification course (theory online and practical on the day).

For example, you wish to have 3 staff members fully trained and 22 given intermediate level training – making up your total allowance of 25 staff per course, the cost would be:

3 x £50 plus £450 = £600 + VAT
